Requirements

Opencart

v1.5.0.1 / v1.5.0.2 / v1.5.0.3 / v1.5.0.4 / v1.5.0.5
v1.5.1 / v1.5.1.1 / v1.5.1.2 / v1.5.1.3
v1.5.2 / v1.5.2.1/
v1.5.3 / v1.5.3.1/ 1.5.4/1.5.4.1/ 1.5.5/1.5.5.1/ 1.5.6/1.5.6.1/
1.5.6.2/1.5.6.3/1.5.6.4
<http://www.opencart.com>

Cron is required if you need to use throttle mode and scheduled Newsletter

In case your hosting does not allow access to set up cron you may check these sites for free Cron services:

<https://www.setcronjob.com/>

<http://www.mywebcron.com/>

We are in no way affiliated with these sites and we cannot guarantee whether they work or not. Please consult each site's documentation first.

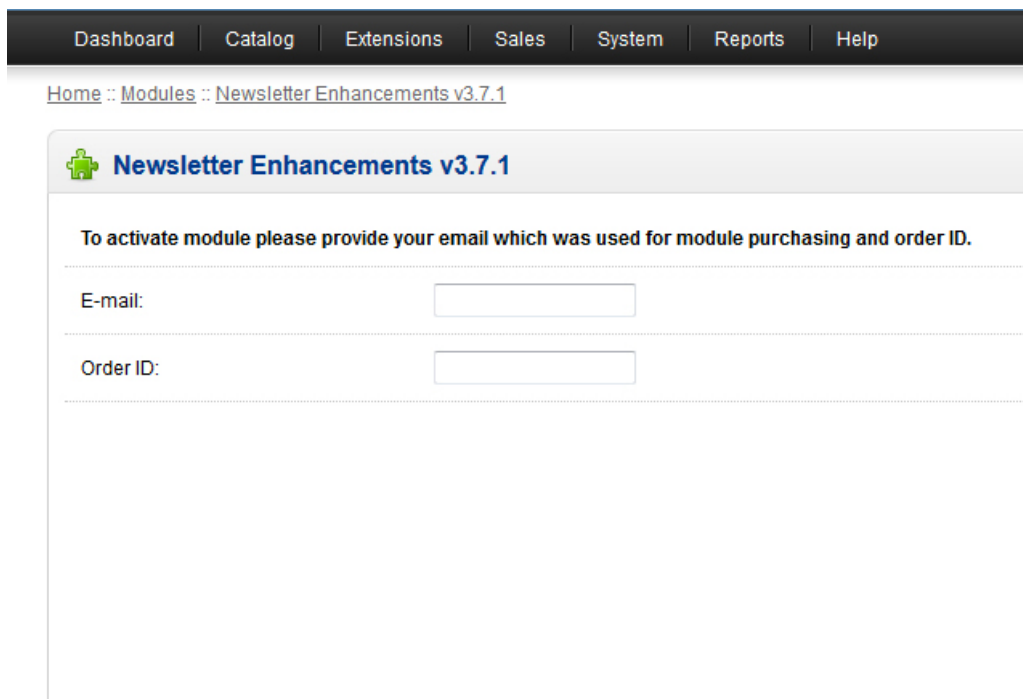

We suggest you use vQmod. However the module may also be used without vQmod. In that case, 2 files (admin/view/template/common/header.tpl - admin/controller/common/header.php) must be edited first. Check our guide: no-vqmod.txt in the Help folder on how to do this.

Installation and Activation

Unzip and upload the contents to Opencart root folder after having installed the vQmod engine (<http://code.google.com/p/vqmod/>)

In Opencart admin "Modules" section click the link "Install" Newsletter Enhancements

The module will be installed in Home -> Modules -> Newsletter Enhancements

The screenshot shows the Opencart admin dashboard with a top navigation bar containing links: Dashboard, Catalog, Extensions, Sales, System, Reports, and Help. Below the navigation bar, a breadcrumb trail reads: Home :: Modules :: Newsletter Enhancements v3.7.1. The main content area features a header for "Newsletter Enhancements v3.7.1" with a green plus icon. Below this, a message states: "To activate module please provide your email which was used for module purchasing and order ID." There are two input fields: "E-mail:" and "Order ID:", each followed by a text box. The page has a light gray background with a white border around the main content area.

Important Module Activation

To activate the module you will need to type your **Order ID** of your order, it may easily be found in your Order History of your OpenCart account

<https://www.opencart.com/index.php?route=account/order> and the **e-mail** used to purchase the module.

Please note you will have to accept these terms and conditions:

- I agree to Use it for ONE website ONLY
- Reselling or giving away for free the downloaded work is NOT ALLOWED
- Copyrights removal is NOT ALLOWED
- Please, read the installation Guide before opening a ticket

Important: As with all Opencart modules you must first give permission to allow the module to work. To do this go to System -> Users -> Users Groups, choose admin group and check all permission boxes for relevant module files that are not checked (module/ne , ne/draft, ne/marketing, ne/newsletter, ne/schedule, ne/stats, ne/subscribers and ne/template).

After the module is installed you may edit all module settings.

In case you don't want to use vQmod please check the file no-vqmod.txt in the folder Help.

This is not an update of the previous V2.0 version and must be installed separately.

Language Issues: Regarding the language, for example if your store uses two languages French and Italian. In the module files there is only an English folder (from the basic Opencart installation) so you will need to duplicate all the contents of the English folder to any other languages folders you wish and rewrite them in the languages of your choice.

Important: Maintenance Mode in OpenCart settings must be set with “NO”, if it's changed to YES, our module will NOT work. Maintenance Mode should be OFF even if logged as admin for the module to work correctly.

Support

The best and fastest way to get support is through our ticket system

<https://www.codersroom.com/support/register.php> .

Please, give us as more information as possible on the issues you are having.

Support is reachable from **Monday to Friday 10.00 a.m. – 6.30 p.m. CET** – Central European Time.

We do our best to answer in 24/48 hours.

We don't give support on Opencart page as our Support Team have access **ONLY** in our dedicated ticket system.

To perform installation and configuration of the module: \$35

- **Can you customize the script for me?**
- **Can you customize the template for me?**

Sure, drop us an e-mail with full specs of what you are looking for and we will send you a quote.

Module Options

Home -> Extensions -> Modules -> Newsletter Enhancements v3.x.x

After the installation, we suggest you edit the module options. To do this go to:
Home -> Extensions -> Modules -> Newsletter Enhancements and click [Edit] on the right side.

Use throttle when sending emails

As many hosting providers have a limit per hour on the number of emails that an account may send, we decided to add the throttle mode option. With this option, you will be able, with the help of cron, to define how many e-mails to be send out each hour.

If you would like to use throttle mode select “Yes” in the options. Also, please check the example of how the **Cron** must be set up. You will be able to track stats of how many mails are currently being send out of a total “Sent # of #” in the relevant page.

Mail Settings

Mail Protocol: you may choose 'Mail' unless your host has disabled the php mail function optionally you may use SMTP or **we suggest is much better to use PHPMailer.**

Mail Settings

Use custom mail configuration: Yes ☒ No ☐

Default

Mail Protocol:
Only choose 'Mail' unless your host has disabled the php mail function.

Mail
Mail
SMTP
Mail (PHPMailer)
SMTP (PHPMailer)

Email address:

Mail Parameters:
When using 'Mail', additional mail parameters can be added here (e.g. "-femail@storeaddress.com").

SMTP Host:

SMTP Username:

SMTP Password:

SMTP Port:
25

SMTP Timeout:
5

Localization

Important: Once this is done, please assign it in Home -> Modules -> Newsletter Enhancements Localization, months/week days in module settings. If you only use the module in the English language - just duplicate the names from labels text.

Localization

 English	
January	January
February	February
March	March
April	April
May	May
June	June
July	July
August	August
September	September
October	October
November	November
December	December

Months

Weekdays

 English	
Sunday	Sunday
Monday	Monday
Tuesday	Tuesday
Wednesday	Wednesday
Thursday	Thursday
Friday	Friday
Saturday	Saturday

From the Module Options you can also create the names for the custom Marketing users. Marketing users are the list of e-mail that you may manually add from the backend, please note that this does not refer to registered Opencart users.

Marketing lists

Default	Another store
Name	
PC	 Remove
Mac	 Remove
	Add

Subscribe guest box

Show subscribe box for guests Yes ☒ No ☐

Modal popup timeout

Time in seconds before popup will be closed. If not specified or zero, close button will be added.

5

Subscribe box fields

Only Email ☐
Email and Name ☐
Email, Firstname and Lastname ☒

Subscription confirmation

This new feature allows you to have customer have a confirmation e-mail once subscribed, this confirmation is only for customer who register from the frontend subscribe box.

Marketing list will get NO subscription confirmation.

Subscription confirmation: Yes ☒ No ☐

Default

English Pyccck

Subject: Subscription Confirmation

Message:

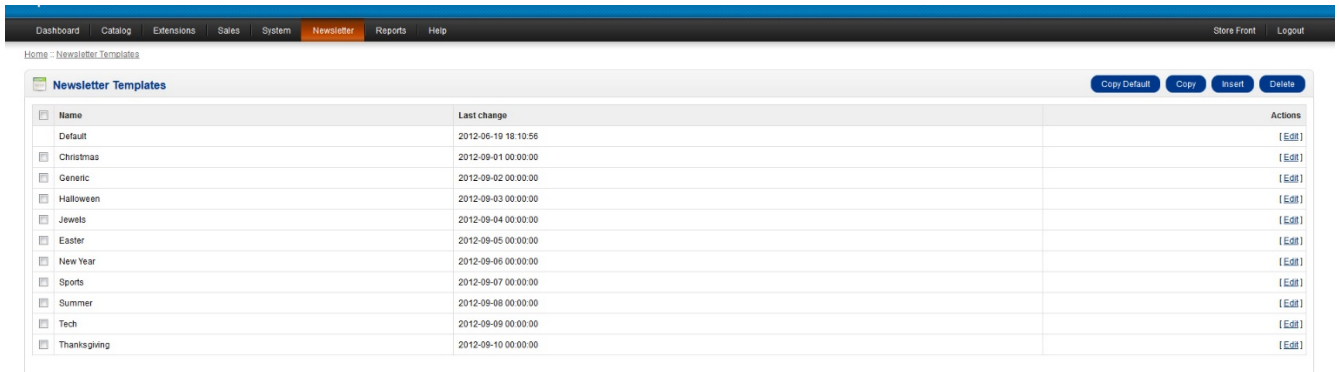

body p

Subject and message personalization tags: {name}, {lastname}, {email} will be replaced with corresponding values. {link} tag will be replaced with url to confirm subscription.

Newsletter Templates

Home -> Newsletter -> Newsletter Templates

After completing, the Module Options go to Home -> Newsletter -> Newsletter Templates

Template

Newsletter Marketing Subscribers

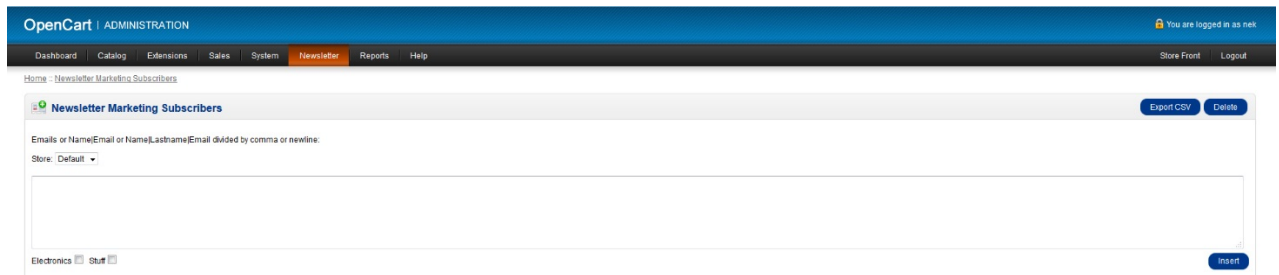

Home -> Newsletter -> Newsletter Marketing Subscribers

If you have a list of customer e-mails that are not registered on your site but want to receive your specials deals and update just copy and paste their e-mails inside the box and select in which group list they should be added. This great tool will help boost your traffic and manage all your customers from a single point.

You may simply cut copy and paste:

Emails or Name|Email or Name|Lastname|Email divided by comma or newline.

You may also **export** data in CSV

The screenshot shows the OpenCart Administration interface. The top navigation bar includes links for Dashboard, Catalog, Extensions, Sales, System, Newsletter (highlighted), Reports, and Help. A user is logged in as 'as net'. The main content area is titled 'Newsletter Marketing Subscribers' and contains a large text input box for pasting subscriber data. Above the box, it says 'Emails or Name|Email or Name|Lastname|Email divided by comma or newline.' and 'Store: Default'. Below the box, there are checkboxes for 'Electronics' and 'Stuff', and an 'Insert' button. At the top right of the main area, there are 'Export CSV' and 'Delete' buttons.

Create Newsletter

Home -> Newsletter ->Newsletter Create and Send

Once you have set up the options and defined your template you can start creating the newsletter.

1. **Template:** Select the Template scheme you would like to use.

To check the default template and to add new ones you must click on Newsletter and then select <http://www.yourdomain.tld/admin/index.php?route=ne/template>

2. **Language:** As our module supports Multilanguage installations you may select the language to be used for your newsletter.

Currency: Select the currency

3. **From:** Select from whom this Newsletter will be sent.
4. **To:** You may select to which Group to send the e-mail. In case you have a custom list of users created in Newsletter Marketing Subscribers you may select Marketing and flag the desired list.
5. **Include selected products:** If this is selected as yes, a new input box will show up (Product to add). Using autocomplete you may easily add the chosen products you want to the newsletter.
6. **Include special offer products:** If this is selected as yes, the newsletter will automatically get populated with products that are in the special offer section of your Opencart shop.
7. **Include latest products:** If this is selected as yes, the newsletter will automatically get populated with the latest products added to your Opencart shop.
8. **Include popular products:** if you select yes, the newsletter will be populated with the most popular products.
9. **Include products from categories:** just select yes and flag the category-categories you want to show in the newsletter and automatically it will be populated with all the products of the selected category-categories.
10. **Attachments:** If you need to upload a file you may easily upload it from here. The attachment will be attached to your newsletter. Suggestion: don't attach huge files

as many e-mail providers have a 10mb attachment size limit.

11. Subject: Subject and message personalization tags: {name}, {lastname}, {email} will be replaced with their corresponding values. Personalized tags are not supported for Affiliates and Marketing recipients.

12. Message: Logo on top will be replaced with the logo uploaded on Opencart administration. Message personalization tags: {name}, {lastname}, {email} will be replaced with their corresponding values. Personalized tags are not supported for Affiliates and Marketing recipients. In case you would like to use the Terms of use | Privacy policy as the template, you must manually link them by using the html editor. Please refer to <http://www.yourdomain.tld/admin/index.php?route=ne/template/update> in order to check the default newsletter template.

In case some users may only read e-mail in txt, they will get a txt e-mail with a message informing them that the newsletter requires html to be read correctly and will be provided with a link to the webpage with the complete, readable web-based Newsletter.

In version 3.0 you will have the ability to save your Newsletter as a Draft and send it after you have reviewed it in Home -> Newsletter -> Draft Newsletter.

We have also added a preview button in the create Newsletter section so you may see how exactly the result will be to the users.

List Subscribers

Home -> Newsletter ->Subscribers

View and edit how many users registered in your newsletter. Order them by name and filter the results.

Scheduled Newsletter

Home -> Newsletter ->Scheduled Newsletter

Are you on vacation? Out of office? Want to automatically schedule your e-mail every week and even auto populate it? Then this is for you!

Just select "Active" and create the newsletter. Your robot will make the job for you. All fields are exactly the same as in the create Newsletter section but this time you must also setup the following:

Recurrent: Yes / No

Frequency:

Day and time to start task:

Selecting recurrent will make the magic of adding random products (you may choose how many products to randomly add) to your newsletter. So just sit back and relax while our system works to boost your sales without you worrying about it.

Newsletter Stats

Home -> Newsletter -> Newsletter Stats

Track and check your stats from your panel. View the list of newsletters that are being sent.

Get the total numbers for recipients, total views, how many e-mail have been sent, newsletters read and unsubscribe clicks

Tracked links check which user has viewed the e-mail and which link they have clicked

Graphical Timeline.

Faq:

➤ **How do I change the default template background color?**

in Home -> Newsletter -> Newsletter Templates

just double click on the main table and it will open the "table proprieties", from there select the tab with the text -> "advanced" and check "Style"

font-family:Arial,Helvetica,sans-serif;font-size:13px;color:rgb(130,130,130);
at the end just add background:#000000; (replace #000000 with the color you prefer)

The final result should be like this:

font-family:Arial,Helvetica,sans-serif;font size:13px;color:rgb(130,130,130);background:#000000;

Screen-cast with more details available here: <http://www.youtube.com/watch?v=0g0wJDkhUYk>

➤ **Can message personalization tags such as {name}, {lastname}, {email} be added to the Subject?**

Sure and data will be replaced with their corresponding values. Personalized messages are not supported for Affiliates and Marketing recipients though.

➤ **In the template there is a logo section, is this the logo uploaded on Opencart settings?**

Yes it's the logo uploaded from the Opencart settings. If you don't see the logo it means that you didn't upload one on Opencart settings. You may decide to upload a different logo by removing {logo} and adding yours via html editor (remember to save the template once you have done this)

Features:

- ✓ Automatically, one click, populate the newsletter with **Latest Products**
- ✓ Automatically, one click, populate the newsletter with **Popular Products**
- ✓ Automatically, one click, populate the newsletter with **Special Offer Products**
- ✓ **Add specific Products** with the **help** of autocomplete
- ✓ Add **attachments** to the newsletter
- ✓ Automatically creates a 2,4 or more column newsletter
- ✓ Allow customers to optionally **view the e-mail** with their browser
- ✓ **Schedule** day/month/year when the newsletter is going to be sent
- ✓ Schedule **recurrent** send with **random auto populate feature**
- ✓ **Create custom list of e-mails** with categories
- ✓ Detailed **Stats** with charts
- ✓ **Track** opened e-mails and **clicked** items
- ✓ Use **embedded images** in newsletter option
- ✓ **Throttle mode** to bypass hosting provider sending limits
- ✓ **Easily Customize Templates**
- ✓ **Multi-store Support**
- ✓ **Multi-Language Support**
- ✓ Save drafts, preview newsletter
- ✓ Show/Hide product price option
- ✓ Show/Hide product description option
- ✓ Decide how many products to show in your newsletter
- ✓ Option to use vQmod or not
- ✓ **Unsubscribe link for registered and custom marketing lists**
- ✓ **PDF Guide** with step by step installation and **instructions**

and much more!
